PRIMARY TEAM MATHS RESOURCES

The Primary Team Maths Resources (PTMR) were initially produced with the aim of helping secondary schools to run maths events for feeder schools. However, the UKMT does not seek to restrict their use, and schools may choose to use the materials in other ways.

The problems on the PTMR are designed to be memorable and enjoyable, to make pupils think, and to encourage team work.

Mathematics controls more aspects of the modern world than most people realise — from iPods, cash machines, telecommunications and airline booking systems to production processes in engineering, efficient distribution and stock-holding, investment strategies and 'whispering' jet engines. The scientific and industrial revolutions flowed from the realisation that mathematics was both the language of nature, and also a way of analysing — and hence controlling — our environment. In the last fifty years, old and new applications of mathematical ideas have transformed the way we live.

The UKMT is a registered educational charity, founded in 1996, with a small professional core of administrators, but with much of the work done by several hundred volunteers, mostly schoolteachers, university students and academics. If you think that UKMT activities are worthwhile then perhaps your school, your family or business might wish to support our work by volunteering or making a donation.

Enquiries about the UKMT or the Primary Team Maths Resources should be sent to:

UKMT, School of Mathematics Satellite, University of Leeds, Leeds LS2 9JT
