A Level Pure Topics	A Level Year 1	A Level Year 2	GCSE / iGCSE	GCSE Further Maths (AQA/Edexcel) or Additional Maths (OCR/Cambridge)
Algeb	ra			
Expanding brackets and simplifying expressions			GCSE	All
Factorising (4 main types – common , difference of 2 squares, product sum and AC method)			GCSE	All
Simultaneous Equations (linear and quadratic) Completing The Square			GCSE	All
Solving and Forming Quadratics			GCSE	All
Surds			GCSE	All
Linear and Quadratic Modelling			0.005	All
Solving Inequalities (linear and quadratic) Solving Inequalities (rational)			GCSE	All
Indices			GCSE	All
Algebraic Fractions			GCSE	All
Discriminant (including hidden discriminant)				All
Binomial Expansion (integers powers)				All
Binomial Expansion (fractional and negative powers) Polynomial Division				All
Factor theorem				All
Remainder Theorem				Edexcel and Cambridge
Partial Fractions				
Geome	etry			
Volume and surface area of 3D shapes (assumed knowledge)			GCSE	All
Straight Line Graphs (including parallel and perpendicular lines)			GCSE	All
Tangent to a circle Circles (equation of a circle)			GCSE	AQA, OCR and Cambridge
Trigonor	netry			Hour, Containe compiliage
Bearings	lietry		GCSE	All
Radians			0052	Edexcel and Cambridge
Arc Lengths And Areas Of Sectors				Edexcel and Cambridge
Given The Value Of One Trig Function, Find Another				All
Sine/Cosine Rule			GCSE	All
Identities and solving with $sin^2x + \cos^2 x = 1$ and $\tan x = \frac{\sin x}{\cos x}$			0.005	
Pythagoras, SOHCAHTOA and 3D trig (assumed knowledge) Trig graphs (sin, cos and tan)			GCSE	All
Identities and solving with $1 + \tan^2 x = \sec^2 x$ and $1 + \cot^2 x = \csc^2 x$				Cambridge
Identities and solving with reciprocal functions: $\sec x = \frac{1}{\cos x}$, $\csc x = \frac{1}{\sec x}$. $\cot x = \frac{1}{\tan x}$				Cambridge
Identities and solving with double angle formulae				
Identities and solving with addition angle formulae				Edexcel
Identities and solving with $asinx \pm bcos x$ or $acos x \pm bsin x$ forms	-			
Small Angle Approximations Inverse Trig – finding values	-			
Trig graphs – reciprocal and inverse trig				
Trigonometric Models Exponentials	and Logs			
Simplifying Expressions				Edexcel, OCR and Cambridge
Solving Logarithmic Equations				Edexcel, OCR and Cambridge
Solving Natural Logarithmic Equations				Edexcel, OCR and Cambridge
Solving exponential equations				Edexcel, OCR and Cambridge
Linear transformations Exponential Models				OCR Only
exponential models Proo	fs			
Counter Example				
Deduction				AQA
Exhaustion		ł		
EXITAUSUOI				
Contradiction				
		ection		
Contradiction $Different$ Note: for parametric differentiation set $y = x^n$ differentiation technique		ection	iGCSE	All
Contradiction Different Note: for parametric differentiation se $y = x^n$ differentiation technique Understanding differentiation as a connected rates of change and small increments		ection	igcse	All All
Contradiction Different Note: for parametric differentiation se $y = x^n$ differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles $-x^n$ types		ection	iGCSE	
Contradiction Different Note: for parametric differentiation se $y = x^n$ differentiation technique Understanding differentiation as a connected rates of change and small increments			iGCSE iGCSE only	
Contradiction Different Note: for parametric differentiation set y = x^n differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles – x^n types Differentiation by 1 st principles – trig functions		ection		All
Contradiction Different Note: for parametric differentiation se y = x^n differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles - x^n types Differentiation by 1 st principles - trig functions Finding gradients Second derivative Stationary points (max/min)		ection		All All All All All
Contradiction Different Note: for parametric differentiation se y = x^n differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles - x^n types Differentiation by 1 st principles - trig functions Finding gradients Second derivative Stationary points (max/min) Verifying stationary points			iGCSE only iGCSE only	All All All All All All
Contradiction Different Note: for parametric differentiation set y = x^n differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles - x^n types Differentiation by 1 st principles - trig functions Finding gradients Second derivative Stationary points (max/min) Verifying stationary points Optimisation			iGCSE only	All All All All All
Contradiction Different Note: for parametric differentiation se y = x^n differentiation technique Understanding differentiation as a connected rates of change and small increments Differentiation by 1 st principles - x^n types Differentiation by 1 st principles - trig functions Finding gradients Second derivative Stationary points (max/min) Verifying stationary points			iGCSE only iGCSE only	All All All All All All

Tangents and Normals (finding equations + other applications)			All		
$f \leftrightarrow f' \leftrightarrow f''$ graphs					
Optimisation		iGCSE only			
Differentiating x in terms of y and getting answer in terms of x					
Composite functions differentiation techniques - chain rule (Cambridge Only		
$(f(x))^n$, $lnf(x)$, $e^{f(x)}$, $a^{f(x)}$, $sinf(x)$ etc)					
Product and Quotient Rule			Edexcel and Cambridge		
Implicit Differentiation					
Rates of Change/Related Rates					
Integratio	on				
Note: for parametric integration see		ion			
	parametric equations see				
$\int x^n \text{ Integration Technique}$			OCR and Cambridge		
Finding area under a curve			OCR and Cambridge		
Composite functions integration techniques $((f(x))^n, \frac{1}{f(x)}, e^{f(x)}, sinf(x))$ etc)			Cambridge Only		
Integration by Parts					
Integration by Substitution					
Trapezium Rule					
Riemann Sums					
Differential Equations					
Sequences an	d Series				
Arithmetic Series			Edexcel and Cambridge		
Geometric Series			Edexcel and Cambridge		
Sigma Notation			Edexcel only		
Recursive Sequences			OCR only		
Function	ns				
Types of functions (one to one, many to one)			Cambridge only		
Basics (notation, composite etc)		GCSE	All		
Finding inverses and knowing when they exist		GCSE	All		
Modulus (solving equalities and inequalities)			Cambridge only		
Graphir	Ig				
Basic graphs (linear, quadratic, cubic, rational exponential, log and trig)		GCSE	All		
Basic graphs (quartic and root)					
More advanced graphs (modulus, reciprocal trig and inverse trig)			Cambridge		
Graphing a modulus graph without being given the equation			Cambridge		
Transformations		GCSE	All		
Finding points of intersection and intercepts		GCSE			
Finding a polynomial equation when given a graph		iGCSE			
Solving graphically		GCSE			
Domain and Range			AQA and Cambridge		
Numerical M	ethods				
Iteration		GCSE			
Newton Raphson		UCJL			
Parametric Eq	uations				
Sketching					
Domain & range					
Finding Points of intersection					
Differentiation					
Integration					
Finding Areas					
Modelling					
Vectors					
	5	0.005			
2D		GCSE	Cambridge		
3D		0.007			
Geometric Problem Solving Types		GCSE	Edexcel only		

Mechanics Topics	A Level Year 1	A Level Year 2	GCSE / iGCSE	GCSE Further Maths (AQA/Edexcel) or Additional Maths (OCR/Cambridge)		
Kinematics						
Displacement, velocity and time graphs						
SUVAT – constant acceleration						
Differentiating and Integrating to get displacement, velocity, acceleration – non constant				Edexcel, OCR and Cambridge		
accel						
Projectiles						
Basic For	ces					
Basic horizontal and vertical forces - finding the resultant and magnitude						
Basic diagonal forces resolving - finding the resultant, magnitude and angles						
Using $f = ma$ to solve basic problems such as boxes on tables etc						
Finding missing angles and forces in force diagrams						
Connected P	articles					
Lifts						
Cars and Trailers						
Pulleys - Vertical						
Pulleys – Inclined planes						
Momer	its					
Flat plane – vertical forces						
Flat plane – diagonal forces						
Inclined plane – ladders						
Vector	S					
Basic resolving on forces given in vector form - resultant and magnitude and finding angles						
SUVAT						
Differentiating and Integrating to get displacement, velocity, acceleration – non constant						
accel						

Statistics Topics	A Level Year 1	A Level Year 2	GCSE / iGCSE	GCSE Further Maths (AQA/Edexcel) or Additional Maths (OCR/Cambridge)
Data				
Sampling				
Large data set (memorised set of facts – doesn't involve maths knowledge)				
Mean calculations			GCSE	
Standard deviation calculations				
Quartile Calculations – without Interpolation	_		GCSE	
Quartile Calculations – with Interpolation				
Outliers				
Coding Box Plots			GCSE	
Cumulative Frequency			GCSE	
Histograms			GCSE	
Comparing Data			GCSE	
Regression and	Correlation			
Definition of correlation	Somenation		GCSE	
Calculating the correlation coefficient r and interpreting it				
Calculating the line of best fit/least squares regression line and interpreting the slope and				
intercept				
Using the line of best fit to make predictions				
Exponential Models				
Probabi	lity			
Set Notation			iGCSE only	
Mutually exclusive and Independent Events				
Conditional Events				
Venn Diagrams			GCSE	OCR only
Tree Diagrams			GCSE	OCR only
Two Way Tables			GCSE	OCR only
Distributi	ons			
Dealing with Discrete Random Variables – Probability Distributions				
Binomial Distribution				
Normal Distribution				
Normal Approximation to Binomial (including Continuity Correction)				
Hypothesis *	Testing			
Binomial Distribution – performing the test, finding critical values and p values				
Normal Distribution – performing the test, finding critical values and p values				
Correlation – performing the test, finding critical values and p values
