Paper 3
Mark scheme
June 2022
Version: 1.1 Final Mark Scheme

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

## Copyright information

AQA retains the copyright on all its publications. However, registered schools/colleges for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to schools/colleges to photocopy any material that is acknowledged to a third party even for internal use within the centre.

## Mark scheme instructions to examiners

## General

The mark scheme for each question shows:

- the marks available for each part of the question
- the total marks available for the question
- marking instructions that indicate when marks should be awarded or withheld including the principle on which each mark is awarded. Information is included to help the examiner make his or her judgement and to delineate what is creditworthy from that not worthy of credit
- a typical solution. This response is one we expect to see frequently. However credit must be given on the basis of the marking instructions.

If a student uses a method which is not explicitly covered by the marking instructions the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

## Key to mark types

| $M$ | mark is for method |
| :--- | :--- |
| $R$ | mark is for reasoning |
| A | mark is dependent on M marks and is for accuracy |
| B | mark is independent of $M$ marks and is for method and accuracy |
| E | mark is for explanation |
| F | follow through from previous incorrect result |

## Key to mark scheme abbreviations

| CAO | correct answer only |
| :--- | :--- |
| CSO | correct solution only |
| ft | follow through from previous incorrect result |
| 'their' | Indicates that credit can be given from previous incorrect result |
| ISW | Ignore subsequent working |
| AWFW | anything which falls within |
| AWRT | anything which rounds to |
| ACF | any correct form |
| AG | answer given |
| SC | special case |
| OE | or equivalent |
| NMS | no method shown |
| PI | possibly implied |
| sf | significant figure(s) |
| dp | decimal place(s) |

## AS/A-level Maths/Further Maths assessment objectives

| AO |  |  |
| :--- | :--- | :--- |
| AO1 | AO1.1a | Select routine procedures |
|  | AO1.1b | Correctly carry out routine procedures |
|  | AO1.2 | Accurately recall facts, terminology and definitions |
|  | AO2.1 | Construct rigorous mathematical arguments (including proofs) |
|  | AO2.2a | Make deductions |
|  | AO2.2b | Make inferences |
|  | AO2.4 | Explain their reasoning |
|  | AO2.5 | Use mathematical language and notation correctly |
|  | AO3.1a | Translate problems in mathematical contexts into mathematical processes |
|  | AO3.2a | Interpret solutions to problems in their original context |
|  | AO3.2b | Where appropriate, evaluate the accuracy and limitations of solutions to problems |
|  | AO3.3 | Translate situations in context into mathematical models |
|  | AO3.4 | Use mathematical models |
|  | AO3.5a | Evaluate the outcomes of modelling in context |
|  | AO3.5b | Recognise the limitations of models |
|  | AO3.5c | Where appropriate, explain how to refine models |

Examiners should consistently apply the following general marking principles

## No Method Shown

Where the question specifically requires a particular method to be used, we must usually see evidence of use of this method for any marks to be awarded.

Where the answer can be reasonably obtained without showing working and it is very unlikely that the correct answer can be obtained by using an incorrect method, we must award full marks. However, the obvious penalty to students showing no working is that incorrect answers, however close, earn no marks.

Where a question asks the student to state or write down a result, no method need be shown for full marks.

Where the permitted calculator has functions which reasonably allow the solution of the question directly, the correct answer without working earns full marks, unless it is given to less than the degree of accuracy accepted in the mark scheme, when it gains no marks.

Otherwise we require evidence of a correct method for any marks to be awarded.

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Work erased or crossed out

Erased or crossed out work that is still legible and has not been replaced should be marked. Erased or crossed out work that has been replaced can be ignored.

## Choice

When a choice of answers and/or methods is given and the student has not clearly indicated which answer they want to be marked, mark positively, awarding marks for all of the student's best attempts. Withhold marks for final accuracy and conclusions if there are conflicting complete answers or when an incorrect solution (or part thereof) is referred to in the final answer.

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| $\mathbf{1}$ | Circles correct answer | 1.1 b | B1 | $\|x\|<4$ |
|  |  |  | 1 |  |

| $\mathbf{Q}$ | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| $\mathbf{2}$ | Ticks correct box | 3.1 a | B 1 | $\int_{0}^{5}\left(5 x-x^{2}\right) \mathrm{d} x$ |

| Makes a valid comment about <br> the data years in LDS <br> For example <br> - data shown only for two <br> years but nothing in between | 2.2 b | E 1 |  |  |
| Question 13 Total |  |  |  |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| $\mathbf{1 4 ( a )}$ | States one of the following <br> assumptions in context <br> - probability of complaint call <br> is constant <br> calls or complaint calls occur <br> independently of each other <br> or have no effect on each <br> other <br> only two outcomes of <br> complaint or non-complaint <br> calls | 3.5b | B1 | The probability of getting a <br> complaint call is fixed <br> Condone 'complaint' for |
| Calls occur independently of each <br> 'complaint call' <br> other |  |  |  |  |
| Do not allow probability being <br> independent <br> Do not allow fixed number of <br> calls | B1 |  |  |  |
|  | States a second assumption in <br> context | 3.5 b | 2 |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 14(b)(i) | Calculates the correct <br> probability ACF <br> AWFW [0.0068, 0.007] | 1.1 b | B1 | 0.00684 |
|  | Subtotal |  | $\mathbf{1}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 14(b)(ii) | Finds $P(X \leq 4)$ or $P(X \leq 3)$ <br> PI by 0.2375 or 0.107 <br> Allow figures to 2sf | 1.1a | M1 | $P(X \leq 3)=0.107$ |
|  | Obtains correct probability ACF <br> AWFW [0.107, 0.11] | 1.1 b | A1 |  |
|  | Subtotal |  | $\mathbf{2}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :---: | :---: | :---: | :---: |
| 14(b)(iii) | Finds their $P(X \leq 9)$ or <br> $P(X \leq 10)$ or $P(X \geq 10)$ or <br> $P(X>10)$ <br> PI by 0.952 or 0.983 or 0.0172 <br> or correct answer <br> Allow figures to 2sf | 1.1a | M1 | $\begin{gathered} P(X \geq 10)=1-P(X \leq 9) \\ =1-0.952 \\ =0.048 \end{gathered}$ |
|  | Obtains correct probability ACF AWFW [0.0479, 0.048] | 1.1b | A1 |  |
|  | Subtotal |  | 2 |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :---: | :---: | :---: | :---: |
| 14(c) | Uses $n p(1-p)$ | 1.1a | M1 | $\begin{aligned} & 10 p(1-p)=1.5^{2} \\ & -10 p^{2}+10 p-2.25=0 \\ & p=0.34 \text { and } 0.66 \end{aligned}$ |
|  | Forms a correct equation in $p$ using 10 and 1.5 ACF | 3.1 a | A1 |  |
|  | Obtains values for $p$ <br> ACF <br> ISW <br> Allow AWFW [0.34, 0.342] and [0.658, 0.66] for $p$ or $p=\frac{10 \pm \sqrt{10}}{20}$ | 1.1b | A1 |  |
|  | Subtotal |  | 3 |  |

|  | Question 14 Total |  | 10 |  |
| :--- | ---: | :--- | :--- | :--- |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 15(a) | States the correct population <br> Allow 'people' or 'names' or <br> 'members' for adults <br> Must see electoral register | 3.3 | B1 | Adults on the electoral register |
|  | Subtotal |  | $\mathbf{1}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 15(b)(i) | Recalls correct name for <br> sampling method | 1.2 | B1 | Systematic sampling |
|  | Subtotal |  | $\mathbf{1}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 15(b)(ii) | States one advantage that <br> sampling method <br> For example <br> - easy to carry out or quick <br> - no bias or it is fair <br> - reduce chance of cluster <br> Do not accept random <br> Do not ignore incorrect <br> statement | 3.5 b | E1 | Cheap to collect |
|  | Subtotal |  | $\mathbf{1}$ |  |

|  | Question 15 Total | 3 |  |
| :--- | :--- | :--- | :--- |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :---: |
| $\mathbf{1 6 ( a )}$ | Writes at least two of 4,15, 17 or <br> 31 in the correct place | 1.1a | M1 |  |
|  | Obtains either 7 or 9 in the <br> correct place | 1.1 b | A1 |  |
|  | Completes the Venn diagram <br> fully correctly including 56 | 1.1 b | A1 |  |
|  | Subtotal |  | $\mathbf{3}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| 16(b)(i) | Obtains the correct probability <br> AWFW [0.42, 0.421] <br> lgnore subsequent incorrect <br> simplification once correct <br> fraction or decimals obtained | 1.1 b | B1 | $\frac{101}{240}$ |
|  | Subtotal |  | $\mathbf{1}$ |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| $\mathbf{1 6 ( b ) ( i i ) ~}$ | Adds their 4 $+15+17+31$ | 1.1 a | M1 | $4+15+17+31=67$ |
|  | PI by correct answer OE <br> The total is not required at this <br> stage | 1.1 b | A1 |  |
|  | Obtains the correct probability <br> AWFW [0.279, 0.28] <br> lgnore subsequent incorrect <br> simplification once correct <br> fraction or decimals obtained | Subtotal |  | $\mathbf{2}$ |
|  |  |  |  |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :--- | :---: | :---: | :--- |
| $\mathbf{1 6 ( b ) ( \text { iii) }}$Adds their $101+31+7$ | 1.1 a | M1 | $101+31+7=139$ |  |
|  | PI by correct answer OE <br> The total is not required at this <br> stage | 1.1 b | A1 |  |
|  | Obtains the correct probability <br> AWFW [0.71, 0.713] <br> Ignore subsequent incorrect <br> simplification once correct <br> fraction or decimals obtained | Subtotal |  | $\mathbf{2}$ |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :---: | :---: | :---: | :---: |
| 16(c) | Finds correct $P(C) \times P(T)$ or <br> uses correct conditional probability eg $P(T \mid C)=\frac{21}{153}$ <br> OE <br> All figures must be correct | 3.1b | M1 | $\begin{aligned} & \begin{aligned} P(C) \times P(T) & =\frac{153}{240} \times \frac{45}{240}=\frac{153}{1280} \\ & =0.12 \end{aligned} \\ & \begin{aligned} P(C \cap T) & = \\ = & \frac{21}{240} \\ & =0.0875 \end{aligned} \\ & 0.12 \neq 0.0875 \end{aligned}$ |
|  | Compares $P(C \cap T)=\frac{21}{240}$ with $\frac{153}{1280}$ and concludes owning a cat and owning a tortoise are not independent <br> eg $\frac{21}{240} \neq \frac{153}{1280}$ so not independent or compares conditional probability eg $\frac{21}{153} \neq \frac{45}{240}$ so not independent <br> All figures must be correct | 2.2a | R1 | Hence events $C$ and $T$ are not independent |
|  | Subtotal |  | 2 |  |
| Question 16 Total |  |  |  |  |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :---: | :---: | :---: | :---: |
| 17 | States both hypotheses correctly for one-tailed test | 2.5 | B1 | $X=$ working hours per week $\begin{aligned} & H_{0}: \mu=34 \\ & H_{1}: \mu>34 \end{aligned}$ |
|  | States or uses correct model PI by mean 34 and variance $\frac{4.5^{2}}{30}$ or standard deviation $\frac{4.5}{\sqrt{30}}$ OE or by correct probability AWFW [0.0037, 0.004] <br> or test statistic $\pm \frac{36.2-34}{4.5 \div \sqrt{30}}$ <br> or test statistic value AWFW $\pm[2.67,2.68]$ <br> or critical region > AWFW [35.6, 35.632] condone $\geq$ <br> or critical value $\pm[35.6,35.632]$ | 1.1a | M1 | $\begin{aligned} & \bar{x} \sim N\left(34, \frac{4.5^{2}}{30}\right) \\ & P(\bar{X}>36.2)=0.004 \\ & 0.004<0.025 \\ & \text { Reject } H_{0} \end{aligned}$ <br> There is sufficient evidence to suggest that the mean working hours have increased. |
|  | Obtains AWFW [0.0037, 0.004] <br> or <br> obtains the correct value of the test statistic AWFW [2.67, 2.68] or <br> obtains the correct critical region > AWFW [35.6, 35.632] condone $\geq$ <br> condone incorrect missing or incorrect labels | 1.16 | A1 |  |
|  | ```Compares their [0.0037, 0.004] with 0.025 or compares their [2.67, 2.68] with }1.9 allow positive values up to 4 for 1.96 or compares their region > [35.6, 35.632] with 36.2 condone \geq``` | 3.5 a | M1 |  |

|  | Infers $H_{0}$ or null hypothesis <br> rejected <br> Condone $H_{1}$ or alternative <br> hypothesis accepted <br> All figures must be correct | 2.2 b | A 1 |  |
| :--- | :--- | :---: | :---: | :---: |
|  | Concludes correctly in context <br> that there is sufficient <br> evidence to suggest that the <br> mean working hours have <br> increased <br> To be awarded R1, marks <br> M1A1M1A1 must be scored as <br> the minimum | 3.2 a | R 1 | 6 |

| Q | Marking instructions | AO | Marks | Typical solution |
| :---: | :---: | :---: | :---: | :---: |
| 18(a) | Calculates $1.78 \pm 2 \times 0.23$ or <br> $1.78 \pm 1.96 \times 0.23$ <br> or <br> calculates $P(1.33<x<2.22)$ <br> Pl by 0.9469 or 0.947 <br> or <br> calculates $\frac{1.33-1.78}{0.23}$ and $\frac{2.22-1.78}{0.23}$ | 3.1b | M1 | $\begin{aligned} & 1.78-2 \times 0.23=1.32 \\ & 1.78+2 \times 0.23=2.24 \\ & 1.32 \approx 1.33 \\ & 2.24 \approx 2.22 \end{aligned}$ <br> Height is continuous data and $95 \%$ of heights lies within two standard deviations of the mean so normal may be a suitable model. |
|  | Obtains 1.32 and 2.24 and states they are approximately 1.33 and 2.22 <br> or <br> obtains 1.33 and 2.23 and states they are approximately 1.33 and 2.22 or obtains 0.9469 or 0.947 and states is approximately 0.95 or <br> obtains -1.96 and 1.91 and states are approximately -2 and 2 | 2.4 | A1 |  |
|  | Infers that the normal distribution may be suitable because height is continuous data and $95 \%$ of heights lies within two standard deviations of the mean or Infers that the normal distribution may be suitable because height is continuous data and $94.69 \%$ or $94.7 \%$ of heights lies between 1.33 and 2.22 | 2.2b | R1 |  |
|  | Subtotal |  | 3 |  |
