## **Mark Schemes for the Units**

June 2008

3895-8/7895-8/MS/R/08

OCR (Oxford, Cambridge and RSA Examinations) is a unitary awarding body, established by the University of Cambridge Local Examinations Syndicate and the RSA Examinations Board in January 1998. OCR provides a full range of GCSE, A level, GNVQ, Key Skills and other qualifications for schools and colleges in the United Kingdom, including those previously provided by MEG and OCEAC. It is also responsible for developing new syllabuses to meet national requirements and the needs of students and teachers.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

# MWWW. My Marks June 20. Painscioud.com 4751 (C1) Introduction to Advanced Mathematics

Sec	tion A			
1	x > 6/4 o.e. isw	2	M1 for $4x > 6$ or for $6/4$ o.e. found or for their final ans ft their $4x > k$ or $kx > 6$	2
2	(i) (0, 4) and (6, 0)	2	1 each; allow $x = 0$ , $y = 4$ etc; condone x = 6, $y = 4$ isw but 0 for (6, 4) with no working	
	(ii) −4/6 o.e. or ft their (i) isw	2	1 for $-\frac{4}{6}x$ or 4/-6 or 4/6 o.e. or ft (accept 0.67 or better)	
			0 for just rearranging to $y = -\frac{2}{3}x + 4$	4
3	(i) 0 or −3/2 o.e.	2	1 each	
	(ii) <i>k</i> < −9/8 o.e. www	3	M2 for $3^2 (-)(-8k) < 0$ o.e. or $-9/8$ found or M1 for attempted use of $b^2 - 4ac$ (may be in quadratic formula); SC: allow M1 for $9 - 8k < 0$ and M1 ft for $k > 9/8$	5
4	(i) T (ii) E (iii) T	3	3 for all correct, 2 for 3 correct. 1 for 2 correct	
	(iv) F			3
5	y(x-2) = (x+3)	M1	for multiplying by <i>x</i> − 2; condone missing brackets	
	xy - 2y = x + 3 or ft [ft from earlier errors if of comparable difficulty – no ft if there are no $xy$ terms]	M1	for expanding bracket and being at stage ready to collect <i>x</i> terms	
	xy - x = 2y + 3 or ft	M1	for collecting <i>x</i> and 'other' terms on opposite sides of eqn	
	$[x = ]\frac{2y+3}{y-1}$ o.e. or ft	M1	for factorising and division	
	alt method:		for either method: award 4 marks only if fully correct	
	$y = 1 + \frac{5}{x - 2}$	M1	,	
	$y-1 = \frac{5}{x-2}$	M1		
	$x-2 = \frac{5}{y-1}$	M1		
		M1		
	$x = 2 + \frac{5}{y - 1}$			4
