4 The table gives information about the prices of cinema tickets.

Cinema ticket	Price
adult ticket	£7.80
child ticket	£5.80
family ticket (for 4 people)	£24.30

Mr Edwards and his 3 children go to the cinema.

It is cheaper for Mr Edwards to buy 1 family ticket rather than 4 separate tickets.

(a) How much cheaper?

$$\begin{aligned} \text{Family ticket} &= \text{£}24.30 \\ \text{Seperate ticket} &= 1 \text{ adult} + 3 \text{ children} \\ &= 7.80 + 5.80 \times 3 && 25.20 - 24.30 \\ &= 7.80 + 17.40 && = \\ &= 25.20 && \text{£}0.90 \\ &&& (3) \end{aligned}$$

How many small bottles can be completely filled with shampoo from the large bottle?

- 6 The incomplete pictogram shows information about the number of cycles sold in a shop on Tuesday, on Wednesday and on Thursday.

Tuesday	
Wednesday	
Thursday	
Friday	
Saturday	

Key:

$$\text{Wheel icon} = 4 \text{ cycles}$$

A total of 20 cycles were sold on Tuesday, Wednesday and Thursday.

8 cycles were sold on Friday.  $- 8 \div 4 = 2 \text{ wheels}$   
15 cycles were sold on Saturday.  $- 15 \div 4 = 3 \frac{3}{4} \text{ wheels}$

Use this information to complete the pictogram.

$20 \text{ cycles} = 1 + 2.5 + 1.5 = 5$   
so 1 wheel represent 4 cycles

$$20 \div 5 = 4$$

The normal price of a driving lesson is £24

Douglas is going to have 12 driving lessons.

Which is the cheaper offer for 12 driving lessons, Offer 1 or Offer 2?

Offer 2

16 Chloe has a van.

She is going to use the van to deliver boxes.  
Each box is a cuboid, 40 cm by 30 cm by 35 cm.

The space for boxes in the van has

maximum length	2.4 m	= 240 cm
maximum width	1.5 m	= 150 cm
maximum height	1.4 m	= 140 cm

The space for boxes is empty.  
Chloe wants to put as many boxes as possible into the van.

She can put 3 boxes into the van in one minute.  
Assume that the space for boxes is in the shape of a cuboid.

(a) Work out how many minutes it should take Chloe to put as many boxes as possible into the van.

$240 \div 40 = 6$       6 boxes maximum in length  
 $150 \div 30 = 5$       5 boxes maximum in width  
 $140 \div 35 = 4$       4 boxes maximum in height
