Paper 1

SPECIMEN PAPER

2 hours

You must answer on the question paper.

No additional materials are needed.

#### INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs. •
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided. •
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in • degrees, unless a different level of accuracy is specified in the question.

#### **INFORMATION**

- The total mark for this paper is 80.
- The number of marks for each question or part question is shown in brackets [].

#### Mathematical Formulae

### 1. ALGEBRA

Quadratic Equation

For the equation  $ax^2 + bx + c = 0$ ,

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

**Binomial Theorem** 

$$(a+b)^n = a^n + \binom{n}{1}a^{n-1}b + \binom{n}{2}a^{n-2}b^2 + \dots + \binom{n}{r}a^{n-r}b^r + \dots + b^n,$$
  
where *n* is a positive integer and  $\binom{n}{r} = \frac{n!}{(n-r)!r!}$ 

Arithmetic series

$$u_n = a + (n-1)d$$
  
$$S_n = \frac{1}{2}n(a+l) = \frac{1}{2}n\{2a + (n-1)d\}$$

Geometric series

$$u_n = ar^{n-1}$$

$$S_n = \frac{a(1-r^n)}{1-r} \quad (r \neq 1)$$

$$S_{\infty} = \frac{a}{1-r} \quad (|r| < 1)$$

#### **2. TRIGONOMETRY**

Identities

$$\sin^2 A + \cos^2 A = 1$$
$$\sec^2 A = 1 + \tan^2 A$$
$$\csc^2 A = 1 + \cot^2 A$$

Formulae for  $\triangle ABC$ 

$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$$
$$a^{2} = b^{2} + c^{2} - 2bc \cos A$$
$$\Delta = \frac{1}{2} bc \sin A$$
$$4037/01/SP/20$$

## 1 DO NOT USE A CALCULATOR IN THIS QUESTION.

The polynomial  $p(x) = 2x^3 - 3x^2 + qx + 56$  has a factor x - 2.

(a) Show that q = -30.

(b) Factorise p(x) completely and hence state all the solutions of p(x) = 0. [4]

3

2 Variables x and y are related by the equation  $y = x\sqrt{x}$ .

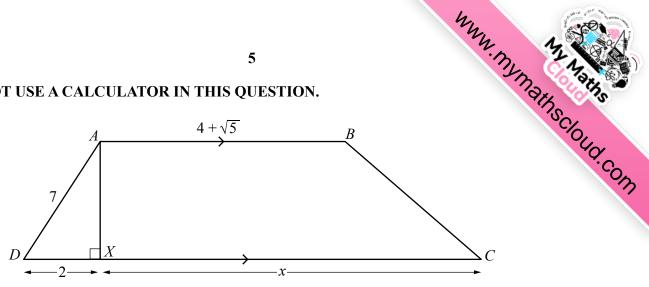

(a) Find 
$$\frac{dy}{dx}$$
. [2]

(b) Hence find the approximate change in x when y increases from 8 by the small amount 0.015. [3]

WWW.MYMathscloud.com (a) Express  $12x^2 - 6x + 5$  in the form  $p(x - q)^2 + r$ , where p, q and r are constants to be 3

(b) Hence find the greatest value of  $(12x^2 - 6x + 5)^{-1}$  and state the value of x at which this occurs. [2]

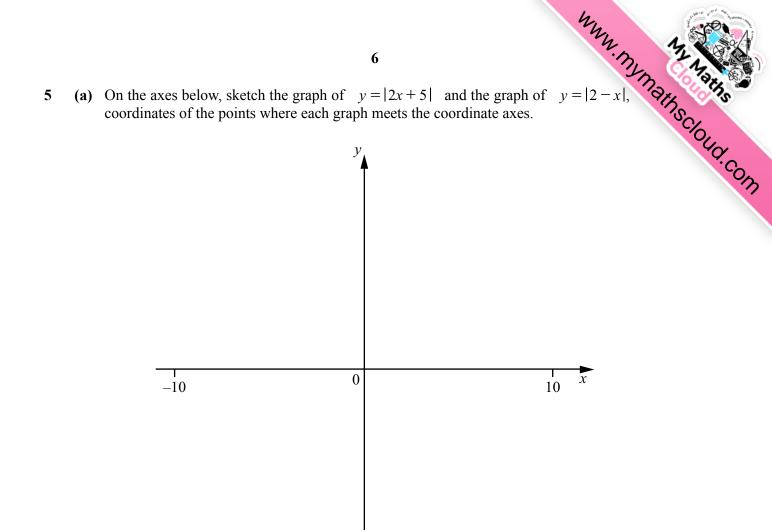

#### 4 DO NOT USE A CALCULATOR IN THIS QUESTION.

5

The diagram shows a trapezium ABCD in which AD = 7 cm and  $AB = (4 + \sqrt{5})$  cm. AX is perpendicular to DC with DX = 2 cm and XC = x cm.

Given that the area of trapezium ABCD is  $15(\sqrt{5} + 2)$  cm<sup>2</sup>, obtain an expression for x in the form  $a + b\sqrt{5}$ , where a and b are integers. [6]

**(b)** Solve  $|2x+5| \le |2-x|$ .

[3]

MMM. MYMathscioud.com Find the equation of the normal to the curve  $y = \frac{2x-1}{\sqrt{x^2+5}}$  at the point where x = 2. 6 Give your answer in the form ax + by = c, where *a*, *b* and *c* are integers.

8 Munu, my hours Munu, my hours Normaths Cloud, Com Com

The diagram shows a badge, made of thin sheet metal, consisting of two semi-circular pieces, centres *B* and *C*, each of radius *x* cm. They are attached to each other by a rectangular piece of thin sheet metal, *ABCD*, such that *AB* and *CD* are the radii of the semicircular pieces and AD = BC = y cm.

(a) Given that the area of the badge is  $20 \text{ cm}^2$ , show that the perimeter, P cm, of the badge is given by

$$P = 2x + \frac{40}{x}.$$
[4]

WWW.MYMathscloud.com (b) Given that x can vary, find the minimum value of P, justifying that this value is a minimum value of P.

10

(i) 
$$\int_{0.2}^{1} e^{5x-1} dx$$
,

(ii) 
$$\int_{1}^{2} \left(x + \frac{1}{x^{2}}\right)^{2} dx.$$

[5]

# **(b)** Find $\int \sin \frac{x}{6} dx$ .

[2]

#### DO NOT USE A CALCULATOR IN THIS QUESTION. 9

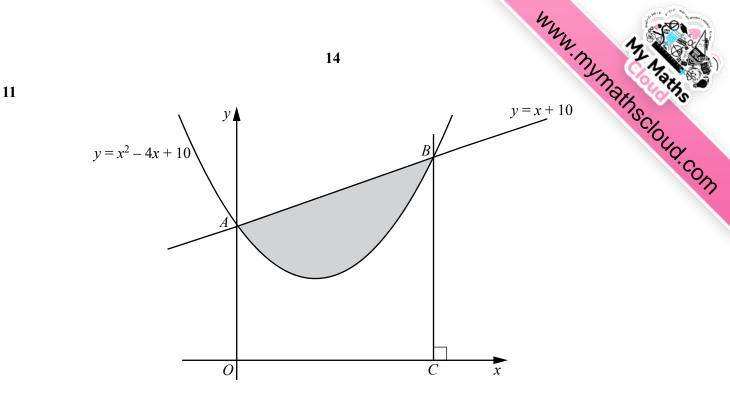

MMM. MYMaths Maths Cloud Com In the expansion of  $(1 + 2x)^n$ , the coefficient of  $x^4$  is ten times the coefficient of  $x^2$ . Find the value of the positive integer *n*.

MMM. MYMathscioud.com (a) An arithmetic progression has a first term of 5 and a common difference of -3. 10 Find the number of terms such that the sum to n terms is first less than -200.

(b) A geometric progression is such that its 3rd term is equal to  $\frac{81}{64}$  and its 5th term is equal to  $\frac{729}{1024}$ . Find the first term of this progression and the positive common ratio of this progression. [5] (i)

(ii) Hence find the sum to infinity of this progression.

The graph of  $y = x^2 - 4x + 10$  cuts the *y*-axis at point *A*. The graphs of  $y = x^2 - 4x + 10$  and y = x + 10 intersect one another at the points *A* and *B*. The line *BC* is perpendicular to the *x*-axis. Calculate the area of the shaded region enclosed by the curve and the line *AB*. [8]
