Paper 2 MARK SCHEME Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

® IGCSE is a registered trademark.

## Cambridge IGCSE - Mark Scheme PUBLISHED

May, Mynathscioud.com The following notes are intended to aid interpretation of mark schemes in general, but individual mark schemes may include marks awarded for specific reasons outside the scope of these notes.

### **Types of mark**

- Μ Method marks, awarded for a valid method applied to the problem.
- Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. For accuracy А marks to be given, the associated Method mark must be earned or implied.
- В Mark for a correct result or statement independent of Method marks.

When a part of a question has two or more 'method' steps, the M marks are in principle independent unless the scheme specifically says otherwise; and similarly where there are several B marks allocated. The notation 'dep' is used to indicate that a particular M or B mark is dependent on an earlier mark in the scheme.

### Abbreviations

answers which round to awrt correct answer only cao dep dependent follow through after error FT ignore subsequent working isw not from wrong working nfww or equivalent oe rounded or truncated rot Special Case SC seen or implied soi

0606/21	Cambridge IGCSE – Mark Scheme May, May, May, May, May, May, May, May,		
Question	Answer	Marks	Guidance
1	Integrates	M1	must be clear attempt to integrate at least one term
	$[y=]x^4 + x(+c)$	A1	Both terms correct
	$17 = 2^4 + 2 + c$	DM1	Substitution of $x = 2$ , $y = 17$ to find $c$
	$y = x^4 + x - 1  \text{cao}$	A1	must have $y =$
2(a)	$2\sqrt{6} \times 3\sqrt{3} = 6\sqrt{18}  \text{oe}$	M1	method must be shown – simplifies and combines product
	$18\sqrt{2}$	A1	If all over common denominator then consider the product for M1A1
	$9\sqrt{2}$ oe soi leading to final answer of $27\sqrt{2}$	B1	
2(b)	$\left[x=\right]\frac{6+\sqrt{3}}{2-\sqrt{3}}$	M1	Expanding and making x subject – condone slips but must be of equivalent difficulty
	$[x =] \frac{6 + \sqrt{3}}{2 - \sqrt{3}} \times \frac{2 + \sqrt{3}}{2 + \sqrt{3}}$ oe and multiplies out numerator and denominator	M1	numerator at least 3 terms; $12 + 2\sqrt{3} + 6\sqrt{3} + 3$
	$15 + 8\sqrt{3}$	A1	
3(i)	$\frac{2x}{x^2+1}$ final answer	B2	<b>B1</b> for $\frac{1}{x^2+1} \times (ax+b)$ , <i>a</i> or <i>b</i> must be non-zero
3(ii)	$\delta y = their\left(\frac{2(3)}{(3)^2 + 1}\right) \times h$ or better	M1	Substitutes $x = 3$ into their $\frac{dy}{dx}$ and multiplies by $h$
	$\frac{6}{10}h$ oe	A1	
4(a)(i)	36	B1	
4(a)(ii)	7	B1	
4(b)	$[y=]5\sin 4x+7$	B4	<b>B1</b> for each of 5, 4 and 7 and <b>B1</b> for sine Accept $a = 5$ , $b = 4$ , $c = 7$ for <b>B3</b>

Question	Answer	Marks	Guidance
5(i)	$16 + 32ax + 24a^2x^2 + 8a^3x^3 + a^4x^4$	B2	<b>B1</b> for at most 2 terms incorrect or missing or for correct but unsimplified form <b>SC1</b> for $16 + 32ax + 24ax^2 + 8ax^3 + ax^4$ or all terms correct listed
5(ii)	$24a^2 = 8a^3$ and solves to given answer	B1	or verifies that $a = 3$ leads to coeff of 216 for both terms must be from correct terms in (i)
5(iii)	x = -0.01 or $ax = -0.03$ soi	M1	
	$\frac{16 + 32(3)(-0.01) + 24(9)(-0.01)^2 \text{ leading to}}{16 - 0.96 + 0.0216 \text{ or } 15.06\text{ isw}}$	A1	Must show clear substitution into their expansion for A1 and reach a value which rounds to 15.1
6(i)	$ (\mathbf{M} =) \begin{pmatrix} 90 & 10 & 30 \\ 0 & 45 & 0 \\ 25 & 0 & 15 \\ 10 & 0 & 100 \end{pmatrix} $	B1	columns and/or rows may be interchanged but must be consistent
6(ii)	$(\mathbf{LM} =)(1 \ 1 \ 1 \ 1) \begin{pmatrix} 90 \ 10 \ 30 \\ 0 \ 45 \ 0 \\ 25 \ 0 \ 15 \\ 10 \ 0 \ 100 \end{pmatrix} = (125 \ 55 \ 145)$	B1	Answer must be of correct order and must be consistent with a correct <b>M</b>
6(iii)	The total numbers of each type of ticket sold by all 4 cinemas oe	B1	
6(iv)	$\left(\mathbf{N}=\right)\begin{pmatrix}5\\4\\3\end{pmatrix}$	B1	Calculation not required
	The <b>total</b> income of <b>all</b> (4) cinemas or other valid comment e.g. <b>total</b> income from <b>all</b> ticket sales	B1	Total cost/value of tickets etc.
7(a)		B2	B1 for each
7(b)(i)	$n(M \cap D) = 0 \text{ or } M \cap D = \emptyset$	B1	No additional brackets e.g. $M \cap D = \{\emptyset\}$ is <b>B0</b>
