## MARK SCHEME for the October/November 2006 question paper

WWW. MYMathscloud.com

# 0580 and 0581 MATHEMATICS

0580/02 and 0581/02 Paper 2, maximum raw mark 70

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

#### **TYPES OF MARK**

Most of the marks (those without prefixes, and 'B' marks) are given for accurate results, drawings or statements.

- **M** marks are given for a correct method.
- B marks are given for a correct statement or step.
- A marks are given for an accurate answer following a correct method.

#### ABBREVIATIONS

| a.r.t.<br>b.o.d. | Anything rounding to<br>Benefit of the doubt has been given to the candidate |
|------------------|--|
| c.a.o.           | Correct answer <b>only</b> (i.e. no 'follow through')                        |
|                  |  |
| e.e.o.           | Each error or omission   |
| f.t.             | Follow through   |
| i.s.w.           | Ignore subsequent working  |
| o.e.             | Or equivalent  |
| SC               | Special case   |
| s.o.i.           | Seen or implied  |
| WW               | Without working  |
| WWW              | Without wrong working  |
|                  | Work followed through after an error: no further error made                  |
