Paper 3 (Core) October/November 2011

2 hours

Candidates answer on the Question Paper.

Additional Materials: Electronic calculator Mathematical tables (optional)

Geometrical instruments Tracing paper (optional)

CANDIDATE

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 104.

(a) Construct triangle ABC accurately, with AC = 10 cm and BC = 8 cm. The line AB has been drawn for you.

- [2]
- **(b) (i)** Using a straight edge and compasses only, construct the bisector of angle A.
- [2]

(ii) The bisector of angle A meets BC at X.

Measure the length of *BX*.

Answer(b)(ii) BX = cm [1]

- (c) (i) Using a straight edge and compasses only, construct the perpendicular bisector of AB. [2]
 - (ii) The perpendicular bisector of AB meets AC at Y and AX at Z.

Measure angle CYZ.

Answer(c)(ii) Angle CYZ = [1]

- (d) Shade the region inside triangle ABC which is
 - nearer to AB than to AC

and

• nearer to B than to A.
