

Cambridge IGCSE[™](9–1)

	CANDIDATE NAME			
	CENTRE NUMBER		CANDIDATE NUMBER	
*	MATHEMATIC	S		0980/22
ω	Paper 2 (Extend	ded)		May/June 2023
00 00				1 hour 30 minutes
¢ 0 8 8 3 8 8 2 4 7 0	You must answe	er on the question paper.		

You will need: Geometrical instruments

INSTRUCTIONS

- Answer all questions. •
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs. •
- Write your name, centre number and candidate number in the boxes at the top of the page. •
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid. •
- Do not write on any bar codes. •
- You should use a calculator where appropriate. •
- You may use tracing paper.
- You must show all necessary working clearly.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in • degrees, unless a different level of accuracy is specified in the question.
- For π , use either your calculator value or 3.142.

INFORMATION

- The total mark for this paper is 70.
- The number of marks for each question or part question is shown in brackets [].

2

5 A spinner is spun.The possible outcomes are A, B, C or D.The probability of spinning A, C or D is shown in the table.

Letter on spinner	А	В	С	D
Probability	0.2		0.05	0.35

Complete the table.

6 $\mathscr{C} = \{x: 1 \le x \le 20\}$ $E = \{\text{even numbers}\}$ $M = \{\text{multiples of 5}\}$

(a) Find n(M).

- (b) Find the elements in the set $E \cap M$.
- (c) $y \notin E$.

Write down a possible value of *y*.

[2]

......[1]

.....[3]

8 Solve.

(a)
$$\frac{30}{x} = 6$$

x = [1]

(b) $11x - 3 \ge 2(2x + 9)$

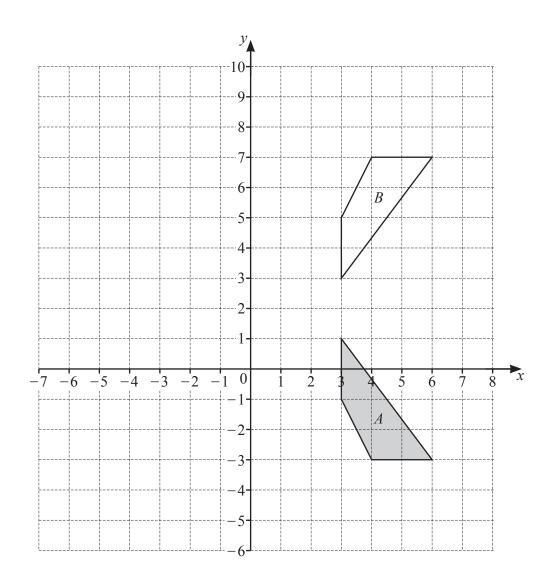

......[3]

9
$$F$$
 is the point $(1, -4)$, $\overrightarrow{FG} = \begin{pmatrix} 8 \\ -3 \end{pmatrix}$ and $\overrightarrow{GH} = \begin{pmatrix} -12 \\ 35 \end{pmatrix}$.
Find
(a) $3\overrightarrow{FG}$
(b) $\overrightarrow{FG} + \overrightarrow{GH}$
(c) the coordinates of the point G
(c) the coordinates of the point G

5

(d) the magnitude of vector \overrightarrow{GH} .

(.....) [1]

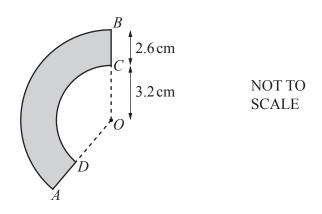

(a) Describe fully the single transformation that maps shape A onto shape B.

(b) Rotate shape A 90° clockwise about the point (-1, 2). [2]
(c) Enlarge shape A by scale factor -2, centre (2, 0). [2]

6

10

The diagram shows a shape, *ABCD*, formed by the sectors of two circles with the same centre *O*. Both sector angles are 140°, OC = 3.2 cm and CB = 2.6 cm. The area of the shape is $k\pi$ cm².

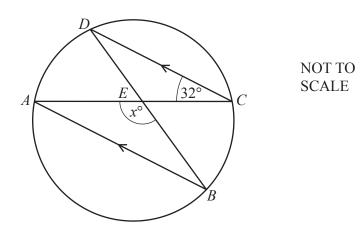

Find the value of *k*.

- 12 One solution of the equation $ax^2 + b = 181$ is x = 8. *a* and *b* are both positive integers greater than 1.
 - (a) Find the value of b.

 $b = \dots [2]$

(b) Write down the other solution of the equation $ax^2 + b = 181$.

x =[1]

A, *B*, *C* and *D* are points on a circle. *AB* is parallel to *DC* and angle $ACD = 32^{\circ}$. Chords *AC* and *DB* intersect at *E*.

Find the value of *x*.

14 f(x) = 5x + 2

Find $f^{-1}(x)$.

 $f^{-1}(x) = \dots$ [2]

- 15 *C* is the point (5, -1) and *D* is the point (13, 15).
 - (a) Find the midpoint of *CD*.

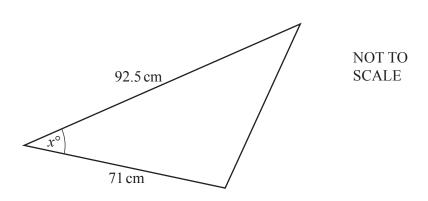

(.....) [2]

(b) Find the gradient of *CD*.

- (c) Find the equation of the perpendicular bisector of *CD*. Give your answer in the form y = mx + c.

16 Write 0.621 as a fraction in its simplest form. You must show all your working.

.....[3]

The diagram shows a triangle with an acute angle marked x° . The area of the triangle is 2143 cm².

Work out the value of *x*.

17

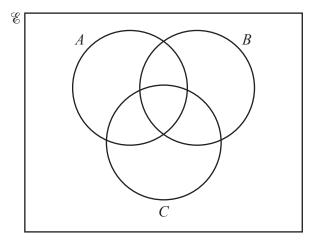

18 Make *x* the subject of the formula.

$$c = \frac{3x}{2x-5}$$

19 *m* is inversely proportional to the square of (t+2). m = 0.64 when t = 3.

Find *m* when t = 8.

20 In the Venn diagram, shade the region $A \cap B' \cap C$.

[1]

21 Solve the equation $5\sin x = -3$ for $0^{\circ} \le x \le 360^{\circ}$.

.....[3]

Questions 22 and 23 are printed on the next page.

22 Write as a single fraction in its simplest form.

 $\frac{5}{3x+2} + \frac{4}{2x-1}$

.....[3]

Bag *A* and bag *B* each contain red sweets and yellow sweets. Anna picks a sweet at random from bag *A*. Ben picks a sweet at random from bag *B*. The probability that Anna picks a red sweet is ²/₅. The probability Anna and Ben both pick a yellow sweet is ¹/₁₀.

Find the probability that Anna and Ben both pick a red sweet.

.....[3]
