

Mark Scheme (Provisional)

Summer 2021

Pearson Edexcel International GCSE Mathematics A (4MA1) Paper 2H

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at www.edexcel.com.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

www.edexcel.com/contactus

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Way Instraction of the Court Con

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme.
 - Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Types of mark

o M marks: method marks

o A marks: accuracy marks

o B marks: unconditional accuracy marks (independent of M marks)

Abbreviations

- o cao correct answer only
- o ft follow through
- o isw ignore subsequent working
- o SC special case
- o oe or equivalent (and appropriate)
- o dep dependent
- o indep independent
- o eeoo each error or omission

• No working

If no working is shown then correct answers normally score full marks

If no working is shown then incorrect (even though nearly correct) answers score no marks.

With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme. If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks.

If a candidate misreads a number from the question. Eg. Uses 252 instead of 255; method marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

If there is a choice of methods mark the one that leads to the answer on the answer line. If there is no answer given then mark the method that gives the lowest mark and award this mark.

If there is no answer on the answer line then check the working for an obvious answer.

• Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: eg. Incorrect cancelling of a fraction that would otherwise be correct.

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect eq algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

• Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another.

Now. The Trains Could Con

NOTES

Please note: [height =] $8 + 0.5 \times 6$ (=11)[metres] means we do not need to see 'height =' or 'metres' and if we see $8 + 0.5 \times 6$ we can award the method mark – and we can award the method mark if we see 11 without the working.

In the mark scheme, if we see a number written "82.5" (or "82.5") in speech marks it means the number can be a followed through value, gained from correct working but with an inaccurate result from this working. It does not mean that the student can use any value. If a student can use any previous value that has been stated, it will be made clear in the mark scheme.

When a certain degree of accuracy is requested in the question, students will normally be given the mark if they give this accuracy or better eg

Q6 asks for one decimal place which gives 10.4

The mark scheme says accept 10.4 - 10.42

Therefore full marks can be awarded for an unrounded answer such as 10.416

If in the working we saw 10.4 or 10.416 and then 10 on the answer line, we could award full marks.

If we did not see an answer in the range 10.4 - 10.42 and the answer of 10 was given then the student would not be able to gain the accuracy mark – as long as correct working was shown the response could be awarded the method marks. An answer of 10 (with no 10.4 - 10.42) with no working or incorrect working would gain no marks.

In most cases rounding instructions are for guidance only and we will accept the figure or better (more figures than specified). If we are insistent on certain rounding, this will be clearly stated in the mark scheme.

International GCSE Maths

Apart from questions 1, 2, 4b, 5, 8, 12d, 19, 21, 23 (where the mark scheme states otherwise) the correct answer, unless clearly obtained from an incorrect method, should be taken to imply a correct method.

Question	Working	Answer	Mark	Notes
1	eg $2 \times 2 \times 150$ or $3 \times 5 \times 40$ or $2 \times 3 \times 100$ or $5^2 \times 24$ or eg 600 2 300 2 150		3	M1 for at least 2 correct stages in prime factorisation which give 2 prime factors — may be in a factor tree or a table or listed eg 2, 2, 150 (see LHS for examples of the amount of work needed for the award of this mark, allow no more than one mistake ft (eg one mistake with 2 prime factors ft: $600 = 200 \times 30 = 2 \times 100 \times 5 \times 6$))
	eg $2 \times 2 \times 2 \times 3 \times 5 \times 5$ $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	$2^3 \times 3 \times 5^2$		M1 for 2, 2, 2, 3, 5, 5 (ignore 1s) (may be a fully correct factor tree or ladder) A1 dep on M2 can be any order (allow 2 ³ . 3 . 5 ²)
				Total 3 marks

Question	Working	Answer	Mark	Notes	
2	eg $\frac{18}{7}$ and $\frac{9}{8}$ oe		3	M1 both fractions expressed as improper fractions, no need for \div or may be equivalent to those given eg $\frac{36}{14}$ or $\frac{27}{24}$ etc. A student coinvert $\frac{9}{8}$ and show multiplication - as shown in the 2nd M1, the mark is then implied.	ould
	eg $\frac{18}{7} \times \frac{8}{9}$ oe or oe $\frac{144}{56} \div \frac{63}{56}$			M1 or for both fractions expressed as equivalent fractions with denominators that are a common multiple of 7 and 8 eg $\frac{144}{56} \div \frac{6}{56}$	$\frac{3}{6}$
	eg $\frac{18}{7} \times \frac{8}{9} = \frac{144}{63} = \frac{16}{7} = 2\frac{2}{7}$ or $\frac{18}{7} \times \frac{8}{9} = \frac{144}{63} = 2\frac{18}{63} = 2\frac{2}{7}$ or $\frac{18^2}{7} \times \frac{8}{9^1} = \frac{16}{7} = 2\frac{2}{7}$ or $\frac{18}{7} \div \frac{9}{8} = \frac{144}{56} \div \frac{63}{56} = \frac{144}{63} = \frac{16}{7} = 2\frac{2}{7}$ or correct working to $\frac{16}{7}$ and writing $2\frac{2}{7} = \frac{16}{7}$	shown		Dep on M2 for conclusion to $2\frac{2}{7}$ from correct working – either sight of the result of the multiplication or division eg $\frac{144}{63}$ must seen and then cancelled or correct cancelling prior to the multiplication to $\frac{16}{7}$ or writing $2\frac{2}{7} = \frac{16}{7}$ (maybe on first line of working) and correct working as far as LHS = $\frac{16}{7}$ NB: use of decimals scores no marks	be
				Total 3 ma	ırks

Question	Working	Answer	Mark	Notes
3	180 + 149 or 360 – 31		2	M1
	Working not required, so correct answer scores full marks	329		A1
				Total 2 marks

Question	Working	Answer	Mark	Notes
4 (a)(i)	other seen orders of letters: a, b, d, e, i, l, n, r, z b, r, I, a, e, z, l, n, d	b, r, a, z, i, l, e, n, d	1	B1 no repeats, letters can be in any order. Condone capital letters rather than lower case letters. (no need for commas)
(ii)		b, z	1	B1 No repeats, letters can be in any order. Condone capital letters. (no need for a comma)
(b)		correct explanation that shows they know the meaning of intersection and empty set	1	B1 eg letter 'a' is in both sets $B \cap K = \{a\}$ Set B and set K have an element (or letter) in common. There is a letter that is in set B and in set K There is an intersection so it isn't the null set There is a letter in common (do not allow 'letters' or 'elements' (plural) in common) (If students mention the letter that is in common, it must be the correct one (ie a))
				Total 3 marks

Angle ABE = 180 - "68" (= 112) and Angle BGF = "112" or Angle ABG = "68" and Angle BGH = "68" or Angle FGJ = "68" or Angle BGF = 180 - "68" (= 112) Working not required, so correct angle scores 3 marks (unless from obvious incorrect working) NB: reasons must include the underlined words Accept ∠for angle(s) and □ for triangle For all angles: They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) Angles in a triangle in a triangle is equal to the two opposite interior angles are equal. Vertically opposite angles are equal. Alternate angles are equal. Alternate angles are equal. Alternate angles are equal. Alternate angles are equal. Allied angles sum to 180° (or co-interior angles) Angles at a point) (B1 for one correct reason appropriate to their method.	Question	Working	Answer	Mark		Notes
or Angle GBC = "68" + 44 (= 112) or Angle BGH = "68" (same as EBC) Angle ABE = 180 - "68" (same as EBC) or Angle ABE = 180 - "68" (same as EBC) or Angle ABE = 180 - "68" (same as EBC) or Angle ABE = 180 - "68" (same as EBC) or Angle ABE = 180 - "68" or Angle BGH = "68" or Angle FGJ = "68" or Angle BGF = 180 - "68" or Angle GGJ = "68" or Angle BGF = 180 - "68" (=112) Working not required, so correct angle scores 3 marks (unless from obvious incorrect working) NB: reasons must include the underlined words Accept ∠ for angle(s) and □ for triangle For all angles: They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) They must be clearly stated as the correct angle or shown on the diagram in the correct position. (Eg just seeing 68 (or a straight line sum to 180° or angles in a triangle in a t	5	Angle <i>EBC</i> or <i>ECB</i> = $(180 - 44) \div 2 (= 68)$		5	M1	Could be seen on diagram
NB: reasons must include the underlined words Accept ∠ for angle(s) and □ for triangle		or Angle GBC = "68" + 44 (= 112) or Angle BGH = "68" (same as EBC) Angle ABE = 180 - "68" (= 112) and Angle BGF = "112" or Angle ABG = "68" and Angle BGH = "68" or Angle			M1	out Angle <i>JGH</i> (an angle corresponding or vertically opposite to <i>JGH</i> or at the same point on a straight line with <i>JGH</i>) Could be seen on diagram.
Accept ∠ for angle(s) and □ for triangle For all angles: They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not sufficient for the award of a mark for angle EBC) Exterior angle in a triangle in a			112		A1	Could be seen in correct place on diagram
		Accept ∠ for angle(s) and □ for triangle For all angles: They must be clearly stated as the correct angle or shown on the diagram in the correct position. (eg just seeing 68 in working without a label is not			B2	eg isosceles triangle (or 2 equal sides, 2 equal angles) Angles in a triangle sum to 180° or angles in a triangle Angles on a straight line sum to 180° Angles on a straight line sum to 180° Exterior angle in a triangle is equal to the two opposite interior angles. Vertically opposite angles are equal. Vertically opposite angles are equal. Corresponding angles are equal. Alternate angles are equal Allied angles sum to 180° (or co-interior angles) Angles at a point (or full turn) add up to 360° (or

Question	Working	Answer	Mark	Notes
14		$\frac{4y^5}{3x^2}$	_	B3 Accept $\frac{4}{3}x^{-2}y^5$ or $\frac{4x^{-2}y^5}{3}$ or $1.3x^{-2}y^5$ oe NB: Must see 4 and 3 and not $16^{\frac{1}{2}}$ or $9^{\frac{1}{2}}$ or $16^{-\frac{1}{2}}$ or $9^{-\frac{1}{2}}$ (allow use of 1.3[33]) If not B3 then B2 for 2 of: correct fraction $(\frac{4}{3}or 1.3)$ (allow use of 1.3[33]) or x term correct $(x^2$ on denominator or x^{-2} on numerator) or y term correct $(y^5$ on numerator or y^{-5} on denominator) If not B2 then B1 for 1 of: correct fraction or x term correct or y term correct fraction or x term correct or y term correct or y term correct or y term correct or y applying negative power to at least 3 out of 4 of y ,
				Total 3 marks

Question	Working	Answer	Mark	Notes
15 (a)		8.5, 5, 4, 5	2	B2 all 4 correct (allow eg 5.0 for 5)
				(B1 for 2 or 3 correct)
(b)				M1 ft their table dep on B1 scored in (a) for 5 or 6 points plotted correctly (tolerance 1 small square)
		fully correct graph	2	A1 A fully correct graph – correct points plotted correctly (within tolerance of 1 small square) and intention to join with a smooth curve (be generous if intention is clearly a smooth curve through all points)
				NB: If a student has nothing in the table for part (a) but draws a fully correct graph in part (b) award the marks in part (a)
				Total 4 marks

Question	Working	Answer	Mark	Notes
16 (a)	$A = \frac{k}{r^2}$		3	M1 oe k can be any letter (must be a letter and not 1)
	$5 = \frac{k}{0.3^2}$ oe or $k = 0.45$ oe			M1 implies first M1 if you see this stage
	Working not required, so correct answer scores full marks (unless from obvious incorrect working)	$A = \frac{0.45}{r^2}$		A1 oe with A as the subject eg $A = \frac{9}{20r^2}$ (allow $A = \frac{k}{r^2}$ where $k = 0.45$ oe)
4.)				(SC if M0 scored then award B2 for $A \propto \frac{0.45}{r^2}$ oe)
(b)	$[A =] \frac{"0.45"}{(7.5A)^2} \text{ oe or } \frac{"0.45"}{56.25A^2} \text{ or}$ $\frac{9}{20(7.5A)^2} \text{ oe}$		3	M1 ft from (a) dep on M2 in (a) $([A =] \frac{"0.45"}{7.5A^2} \text{ is zero marks unless recovered later})$
	$A^3 = \frac{\text{"0.45"}}{56.25} (A^3 = \frac{1}{125} \text{ or } 0.008 \text{ oe) or}$ 125 $A^3 = 1 \text{ oe}$			M1 ft their 0.45 dep on M2 in (a) Must include A ³
	Working not required, so correct answer scores full marks (unless from obvious incorrect working)	0.2		A1 oe
				Total 6 marks

Question	Working	Answer	Mark	Notes
17	eg $\frac{4-(-1)}{6-4}$ (= $\frac{5}{2}$ = 2.5)		4	M1 for a method to find the gradient of L
	eg $\frac{-1}{"2.5"}$ (= $-\frac{2}{5}$ = -0.4) or $\frac{-1}{their}$ gradient oe			M1 ft for a method to find the gradient of M if <i>their</i> gradient of L clearly stated (even if no method shown for gradient of L)
	y = ``-0.4'`x + 8 oe eg $y - 8 = -\frac{2}{5}(x - 0)$ or $(8 \div 2) \times 5 (= 20) \text{ oe or}$ $8 \div (-\text{`their gradient of M'})$			M1 dep on previous M1 for substitution of $(0, 8)$ into equation for a line or use of $(8 \div 2) \times 5$ (= 20) (maybe on diagram) NB: 20 gains M3 if clearly intended as x coordinate (stated or on a diagram)
	Working not required, so correct answer scores full marks (unless from obvious incorrect working)	(20, 0)		A1
				Total 4 mark

Question	Working	Answer	Mark		Notes
18	[ADC =] 180 - 98 (= 82)		6	M1	may be seen on diagram
	$[AC^{2} =] 8^{2} + 7.5^{2} - 2 \times 8 \times 7.5 \times \cos(98) (= 136.95)$			M1	correct equation for AC or AC^2
	$[AC =]\sqrt{"136.95"}$ or $\sqrt{64 + 56.25 + 16.7} (= 11.7)$ oe			M1	complete method to find AC showing correct order of operations
	eg [[AD =] $\frac{"11.7"\sin 35}{\sin"82"}$ (= 6.77) or [DC =] $\frac{"11.7"\times\sin"63"}{\sin"82"}$ (=10.5)oe (where "82" = 180 - 98 , "63" = 180 - "82" - 35)			M1	correct calculation for <i>AD</i> or <i>DC</i> dep on 1 st M1 and 2 nd M1
	eg $[AD =] \frac{"11.7"\sin 35}{\sin"82"}$ and $[DC =] \frac{"11.7"\sin"63"}{\sin"82"}$ oe or $[AD =] \frac{"11.7"\sin 35}{\sin"82"}$ and $[DC =] \sqrt{"11.7"^2 + "6.77"^2 - 2 \times "11.7" \times "6.77" \times \cos"63"}$ $[DC =] \frac{"11.7"\sin"63"}{\sin"82"}$ and $[AD =] \sqrt{"11.7"^2 + "10.5"^2 - 2 \times "11.7" \times "10.5" \times \cos 35}$ Where "63" = 180 - "82" - 35			M1	correct calculations for AD and DC ($AD = 6.77$ DC = 10.5) dep on 1 st M1 and 2 nd M1
	Working not required, so correct answer scores full marks (unless from obvious incorrect working)	32.8		A1	accept 32.7 – 32.9
					Total 6 marks

Question	Working		Answer	Mark		Notes
19	$x^2 + (3 - 2x)^2 = 18$	$\left(\frac{3-y}{2}\right)^2 + y^2 = 18$		5	M1	substitution of linear equation into quadratic
	$5x^2 - 12x - 9[=0]$ oe	$5y^2 - 6y - 63 = 0$ oe			M1	simplified to a correct 3 term quadratic
	(5x+3)(x-3) = 0	(5y-21)(y+3) = 0			M1ft	dep on M1 for solving <i>their</i> 3 term quadratic equation using
	$\frac{-(-12) \pm \sqrt{(-12)^2 - 4 \times 5 \times (-9)}}{2 \times 5}$	$\frac{-(-6) \pm \sqrt{(-6)^2 - 4 \times 5 \times (-63)}}{2 \times 5}$				any correct method (if factorising, allow brackets which expanded give 2 out of 3 terms
	$5[(x-\frac{12}{10})^2 - \frac{144}{100}] - 9 = 0$ oe	$5[(y - \frac{6}{10})^2 - \frac{36}{100}] - 63 = 0$ oe				one sign error and some simplification – allow as far as
						$\frac{12 \pm \sqrt{144 + 180}}{10} \text{ or }$
						$\frac{6 \pm \sqrt{36 + 1260}}{10})$ (if completing
						the square allow as far as shown)
			x = -0.6		A 1	oe dep on M2 for both <i>x</i> -values
			and $x = 3$			OR both <i>y</i> -values
			OR $y = 4.2$			
			and $y = -3$			
	Working must be shown		x = -0.6,		A1	oe dep on M2 (must be clearly
			y = 4.2			shown as correct pairs), accept
			x = 3,			answers given as coordinates
			y = -3			Total 5 marks
					l	1 Otal 5 Marks

Question	Working	Answer	Mark		Notes
20	eg $\sqrt{\frac{36}{25}} \left(= \frac{6}{5} \right)$ or $\sqrt{\frac{25}{36}} \left(= \frac{5}{6} \right)$ or $\sqrt{36} : \sqrt{25} (6:5)$ or $\sqrt{25} : \sqrt{36} (5:6)$ or $\frac{(\sqrt{25})^3}{(\sqrt{36})^3} = \left(\frac{125}{216} \right)$ oe or $\frac{36^3}{25^3} = \frac{(\text{vol of large})^2}{300^2}$ or $\frac{36}{25} = \frac{(\text{vol of large})^{\frac{2}{3}}}{300^{\frac{2}{3}}}$ oe eg $300 \times \left(\frac{6}{5} \right)^3$ or $300 \div \left(\frac{5}{6} \right)^3$ oe or $\sqrt{\frac{300^2 \times 36^3}{25^3}}$ or $\left(\frac{36 \times 300^{\frac{2}{3}}}{25} \right)^{\frac{3}{2}}$ oe		3	M1	for a correct scale factor for length – may be given as a fraction or ratio or a correct scale factor for volume given as a fraction or ratio or a correct equation for the volume of each large block for a complete method to find the volume of a large block
	Working not required, so correct answer scores full marks (unless from obvious incorrect working)	518.4		A1	allow 518
					Total 3 marks

Question	Working	Answer	Mark		Notes
21	$ \left \frac{\mathrm{d}y}{\mathrm{d}x} \right = 2 \times kx - 16x^{-2} \text{ or } 2kx - \frac{16}{x^2} \text{ oe } $		5	M2	for both terms differentiated correctly
				(M1)	for one term differentiated correctly
	$2kx - 16x^{-2} = 0$ oe			M1	ft dep on M1
	eg $\frac{8}{27}k = 8$ or $\frac{4}{3}k = 36$ or $k = 27$ oe			M1	(not ft) for substituting $x = \frac{2}{3}$ into their correct equation for k and getting as far as one step from the value of k or the correct value of k
	Working must be seen	36		A1	dep on M4
