Pearson Edexcel International GCSE In Mathematics B (4MB1) Paper 01

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme.
 - Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Types of mark

o M marks: method marks

A marks: accuracy marks

o B marks: unconditional accuracy marks (independent of M marks)

Abbreviations

- o cao correct answer only
- o ft follow through
- o isw ignore subsequent working
- o SC special case
- o oe or equivalent (and appropriate)
- o dep dependent
- o indep independent
- awrt answer which rounds to
- o eeoo each error or omission

No working

If no working is shown then correct answers normally score full marks
If no working is shown then incorrect (even though nearly correct) answers score no marks.

With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks.

If a candidate misreads a number from the question: eg. Uses 252 instead of 255; method marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

If there is a choice of methods shown, mark the method that leads to the answer on the answer line; where no answer is given on the answer line, award the lowest mark from the methods shown.

If there is no answer on the answer line then check the working for an obvious answer.

• Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: eg. Incorrect cancelling of a fraction that would otherwise be correct.

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect eg algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

• Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded to another.

23	$x^2 - 5x + 6 = (x - 3)(x - 2)$		5	M1 for factorising $x^2 - 5x + 6$. Allow a factorised expression that expands to give 2 of 3 terms correct
	$x^2-4=(x-2)(x+2)$			M1 for factorising $x^2 - 4$ correctly
	$(x-3)^2 \times \left(\frac{2}{(x-3)(x-2)}\right)$			M1 for dealing with the division correctly. Turning upside down and multiplying – need not be factorised. Must be done before the subtraction
	eg $\frac{2(x-3)-1}{(x-2)}$ or $\frac{(2x-7)(x+2)}{(x+2)(x-2)}$ or			M1 dependent on 3 rd M for a single fraction with at most one incorrect term (when expanded). eg if they had +5 rather than -7 that counts as one
	$\frac{2x^2 - 7x + 4x - 14}{(x+2)(x-2)} \text{ or } \frac{2x-7}{x-2} \text{ or }$ $\frac{2(x-3)(x-2) - (x-2)}{(x-2)(x-2)}$			error. ISW Allow $\frac{2(x-3)^2(x^2-4)-(x+2)(x^2-5x+6)}{(x^2-5x+6)(x^2-4)}$ or
	(x-2)(x-2)			$\frac{3x^2 + 2x - x^3 - 6}{x^4 + 2x^2 - 5x^3 + 20x - 24}$ oe if fully correct
	Working required	$\frac{2x-7}{x-2}$		dependent on all 4 M marks awarded. Allow 2—3
		λ Δ		Allow $2 - \frac{1}{x-2}$

24(a)	$18 \times (-1)^3 - 9 \times (-1)^2 - 17 \times (-1) + 10$		2	M1 correct substitution of $x = \pm 1$ into equation. Must be same
				value substituted. Allow $18 \times (\pm 1) - 9 \times 1 - 17 \times (\pm 1) + 10$ or
				-18-9+17+10 or $18-9-17+10$
	Working required	= 0		A1 dep on M1 must have no errors and = 0
(b)	$18x^2$		4	M1 for a start to find the quadratic factor. This may be seen in
				part (a)
	$18x^2 - 27x + 10$			M1 for a fully correct 3 term quadratic. This may be seen in
				part (a)
	(3x-2)(6x-5)			M1 correct method to factorise their 3TQ – Must multiply out
				to give 2 of their terms.
	Working required	(x+1)(3x-2)(6x-5)		A1 Dep on M2 (2 of the previous 3 method marks awarded)
				Only accept what is seen (any order). Don't accept a list
				with commas. Condone = 0 but do not ISW if gone on to
