GCSE Mathematics Practice Tests: Set 7

Paper 1F (Non-calculator)

Time: 1 hour 30 minutes

You should have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser. Tracing paper may be used.

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer all questions.
- Answer the questions in the spaces provided
 there may be more space than you need.
- Calculators must not be used.
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must show all your working out.

Information

- The total mark for this paper is 80
- The marks for **each** question are shown in brackets
 - use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

Answer ALL questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

7. 60 people each took a driving test one day.

The ratio of men to women was 1:2.

 $\frac{1}{5}$ of the 60 people failed their test.

17 of the men passed their test.

(a) Use this information to complete the frequency tree.

(b) Find the probability that a man failed his driving test on this day.

	()

- **10.** There are 60 students at a college.
 - 20 students study both French and Spanish.
 - 13 students study French but not Spanish.
 - A total of 43 students study Spanish.
 - (a) Complete the Venn diagram for this information.

(3)

One of the students at the college is to be selected at random.

(b) Write down the probability that this student studies neither French nor Spanish.

23.	The perimeter of a triangle is 90 cm. The lengths of the sides of the triangle are in the ratios 3:5:7			
	Work out the length of the longest side of the triangle.			
	(Total for Question 23 is 3 marks)			

x stamps in a small packet (x + 3) stamps in a medium packet and (x + 4) stamps in a large packet

The total number of stamps in the three packets is N.

(i)	Write down an equation for N in terms of x .
	Give your equation in its simplest form.

			(2)

There is a total of 61 stamps.

(ii) Work out the number of stamps in the medium packet.

(3) (Total for Question 24 is 5 marks)

25.	(a) Write 75 000 in standard form.
	(1)
	A computer can carry out a simple calculation in 1 picosecond where
	1 picosecond = 10^{-12} seconds.
	(b) Write down in standard form the time, in seconds, for this computer to carry out 75 000 simple calculations.
	seconds
	(2)
