Mathematics test Paper 1 Calculator not allowed

Ī

-

Please read this page, but do not open your booklet until your teacher tells you to start. Write your name and the name of your school in the spaces below.

First name	
Last name	
School	

Remember

- The test is 1 hour long.
- You **must not** use a calculator for any question in this test.
- You will need: pen, pencil, rubber, ruler, a pair of compasses and tracing paper (optional).
- Some formulae you might need are on page 2.
- This test starts with easier questions.
- Try to answer all the questions.
- Write all your answers and working on the test paper do not use any rough paper. Marks may be awarded for working.
- Check your work carefully.
- Ask your teacher if you are not sure what to do.

10. The diagram shows a **square**.

Ť T

ļ

Two straight lines cut the square into four rectangles.

The area of one of the rectangles is shown.

Work out the area of the rectangle marked A.

..... cm² 2 marks

11. (a) Look at this information.

Two numbers multiply to make zero.

One of the statements below is true.

Tick (\checkmark) the true statement.

Neither number can be zero.

(b) Now look at this information.

Two numbers add to make zero.

11

If one number is zero, what is the other number?

If neither number is zero, give an example of what the numbers could be.

15. This shape has been made from two congruent **isosceles** triangles.

Not drawn accurately

What is the size of angle p?

ļ

ļ

16. Bumps are built on a road to slow cars down.

ŀ

The stem-and-leaf diagrams show the speed of **15 cars** before and after the bumps were built.

....

							Key:						
							2	3	m	ean	is 23	3 mp	bh
	Be	fore	•					A	fter				
2							2	3	4	4			
2	7	8					2	6	6	7	8	8	9
3	0	2	4				3	0	0	0	1	2	
3	5	6	8	9			3	5					
4	1	3	4	4	4		4						
4	6						4						

(a) Use the diagrams to write the missing **numbers** in these sentences.

Before the bumps:

The maximum speed was mph, and

..... cars went at more than 30 mph.

After the bumps:

The maximum speed was mph, and

..... cars went at more than 30 mph.

. . . . 2 marks

. . . . 1 mark

(b) Show that the **median** speed fell by 10 mph.

Ē

20. Car tyres are checked for safety by measuring the tread.

The tread on a tyre and the distance travelled by that tyre were recorded for a sample of tyres. The scatter graph shows the results.

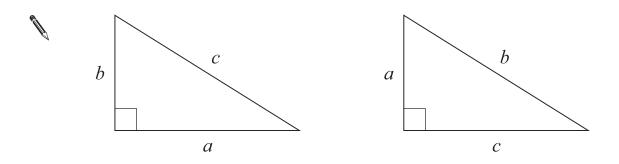

Tyres with a tread of **less than 1.6mm** are illegal.

Suppose the government changes this rule to less than 2.5 mm.

- (a) How many of these tyres would now be illegal?

21. (a) In which triangle below does $a^2 + b^2 = c^2$? Tick (\checkmark) the correct triangle.

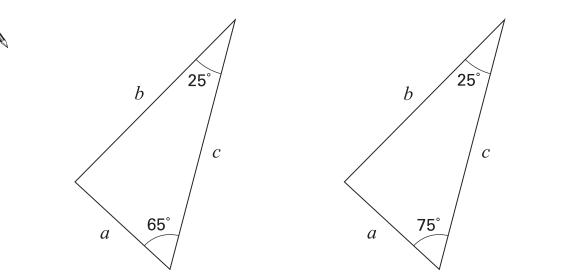

ł

For the **other** triangle, write an equation linking a, b and c

. . . . 1 mark

(b) In which triangle below does $a^2 + b^2 = c^2$? Tick (\checkmark) the correct triangle.

Not drawn accurately

. . . 1 mark

For the **other** triangle, explain why $a^2 + b^2$ does not equal c^2

22. Meg and Ravi buy sweet pea seeds and grow them in identical conditions.

Meg's results:

ļ

Ì

Number of packets	Number of seeds in each packet	Number of seeds that germinate from each packet
5	20	18, 17, 17, 18, 19

Ravi's results:

Number of packets	Number of seeds in each packet	Total number of seeds that germinate
10	20	170

(a) Using Meg's results and Ravi's results, calculate two different estimates of the **probability** that a sweet pea seed will germinate.

Using Meg's results:

Using Ravi's results:

1 mark

(b) Whose results are likely to give the better estimate of the probability?

Ø	Meg's	Ravi's		
Exp	olain why.
